

LabSheet 8 - Activity 01:

Load Sales data set to Power BI and create the following data visualizations.

1. Create the following data visualization charts

Import sales and profit.xlsx → From the navigator tick only financials → Load

a. Display the sales by country using a column chart

Visualizations → Build visual → Stacked column chart → [Country:X-axis], [Sales(Sum of Sales):Y-axis]

i. Change the color of the data columns to purple.

Format your visual → Visual → Columns

ii. Draw a line to mark the average sales.

Add further analyses to your visuals → Constand line → Apply settings to → + Add line → Conditional formatting(fx) → What field should we base this on → Select sales(Sum of Sales) from the drop down → Select Average from Summarization → Ok

- Select average from the Y-axis drop down and see how chart change
- Tick Data labels from Format your visuals
- Tick Data labels from Add further analyses to your visuals

b. Sales and Profit by month

i. Display sales and profit for each month in a stacked area chart

Stacked area chart → [Month Name:X-axis], [Sales(Sum of Sales) & Profit(Sum of Profit):Y-axis]

ii. Sort the values in the ascending order

Thee dots(More options) of the Stacked area chart → Sort axis → Sort accending

iii. Display the data in the order of months

Three dots(More options) of the Stacked area chart → Sort axis → Month Name

iv. Display the records only for the first 4 months of the year

Filters → Filters on this visual → Month Name(Drop Down) → Tick January, February, March, April

v. Display maximum sales and maximum profit of each month in the graph

Visualizations → Add data to your visual → In the Y-axis section → Select Maximum from Sum of Sales drop down, Select Maximum from Sum of Profit drop down

c. Sales by product

i. Display the sales by product in a funnel

Visualizations → Funnel → [Product:Category] → [Sales(Sum of Sale):Values]

ii. Display the records in the ascending order of sales

Three dots(More options) of the Funnel → Sort axis → Sum of Sales
Three dots(More options) of the Funnel → Sort axis → Sort ascending

iii. Display the average sales records by product

Visualizations → Build visual → In the Values section Select Average from the Sum of Sales drop down

iv. Display the products with average sales records more than 165000

Filters → Expand Average of Sales → Select is greater than from the Show items when the value drop down → type 165000 in the below text area → click Apply filter

v. Arrange the records in ascending order and give separate colors for each product

Three dots(More options) of the Funnel → Sort axis → Products

Three dots(More options) of the Funnel → Sort axis → Sort ascending

Visualizations → Format visual → Colors → Tick the Show all →
Change the colors as you want

d. Sales and profit by segment

- i. Display sales and profit by segment in a bar graph

Visualizations → Build visual → Stacked column chart → [Segment:X-axis] → [Sales(Sum of Sales) & Profit(Sum of Profit):Y-axis]

- ii. Mark the minimum profit level in the graph and display its value

Visualizations → Add further analyses to your visual → Constand line → Apply settings to → + Add line → Conditional formatting(fx) → Select Profit from the Segment drop down under What field should we based this on? → select Minimum from the Summarization drop down → click OK

Visualizations → Add further analyses to your visual → Tick the Data label

- iii. Display the minimum sales level and its value in another color

Visualizations → Add further analyses to your visual → Constand line → Apply settings to → + Add line → Conditional formatting(fx) → Select Sales from the Segment drop down under What field should we based this on? → select Minimum from the Summarization drop down → click OK

Visualizations → Add further analyses to your visual → Tick the Data label

Dinuka D. Kirindage

2. Create all the charts in the same page. Add an appropriate title.

Home → Text box → Place it into the top of the page → Add a Tile (Lab Sheet 8 charts) → Do necessary modifications

Format → Effects → Background → Change the color
